

Review. A review of attenuation correction techniques for tissue fluorescence	1
R. S. Bradley & M. S. Thorniley	
Review. Hyperelastic modelling of arterial layers with distributed collagen fibre orientations	15
T. C. Gasser, R. W. Ogden & G. A. Holzapfel	
Mussel (<i>Mytilus edulis</i>) byssus deposition in response to variations in surface wettability	37
N. Aldred, L. K. Ista, M. E. Callow, J. A. Callow, G. P. Lopez & A. S. Clare	
Reconstruction algorithm for single photon emission computed tomography and its numerical implementation	45
A. S. Fokas, A. Iserles & V. Marinakis	
Infectious disease control using contact tracing in random and scale-free networks	55
I. Z. Kiss, D. M. Green & R. R. Kao	
A non-invasive method for <i>in situ</i> quantification of subpopulation behaviour in mixed cell culture	63
B. D. MacArthur, R. S. Tare, C. P. Please, P. Prescott & R. O. C. Oreffo	
Optimality of the basic colour categories for classification	71
L. D. Griffin	
Analysis of single ion channel data incorporating time-interval omission and sampling	87
Y.-K. The & J. Timmer	
Exaggeration and suppression of iridescence: the evolution of two-dimensional butterfly structural colours	99
S. Wickham, M. C. J. Large, L. Poladian & L. S. Jermiin	
Report. Diving behaviour of whale sharks in relation to a predictable food pulse	109
R. T. Graham, C. M. Roberts & J. C. R. Smart	
Report. Nano measurements with micro-devices: mechanical properties of hydrated collagen fibrils	117
S. J. Eppell, B. N. Smith, H. Kahn & R. Ballarini	
Statistical mechanics of molecular and cellular biological systems	
Papers of a themed supplement organized and edited by T. C. B. McLeish	
Introduction: statistical mechanics of molecular and cellular biological systems	123
T. McLeish	
Dynamic allostery of protein alpha helical coiled-coils	125
R. J. Hawkins & T. C. B. McLeish	
A multi-objective evolutionary approach to the protein structure prediction problem	139
V. Cutello, G. Narzisi & G. Nicosia	
An elastically tethered viscous load imposes a regular gait on the motion of myosin-V. Simulation of the effect of transient force relaxation on a stochastic process	153
M. J. Schilstra & S. R. Martin	
Rheopexy of synovial fluid and protein aggregation	167
K. M. N. Oates, W. E. Krause, R. L. Jones & R. H. Colby	
Elucidating the digital control mechanism for DNA damage repair with the p53–Mdm2 system: single cell data analysis and ensemble modelling	175
B. A. Ogunnaike	
Topology and static response of interaction networks in molecular biology	185
O. Radulescu, S. Lagarrigue, A. Siegel, P. Veber & M. L. Borgne	
Self-engineering capabilities of bacteria	197
E. Ben-Jacob & H. Levine	

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
