22 June 2006
volume 3 · number 8 · pages 351–469

Review. Memories for life: a review of the science and technology
K. O’Hara, R. Morris, N. Shadbolt, G. J. Hitch, W. Hall & N. Beagrie

Identification of prognostic signatures in breast cancer microarray data using Bayesian techniques
L. Carrivick, S. Rogers, J. Clark, C. Campbell, M. Girolami & C. Cooper

Multiple feedback loop design in the tryptophan regulatory network of Escherichia coli suggests a paradigm for robust regulation of processes in series
S. Bhartiya, N. Chaudhary, K. V. Venkatesh & F. J. Doyle III

Nanoprinting onto cells
A. S. G. Curtis, M. J. Dalby & N. Gadegaard

The evolution of hyperactivity, impulsivity and cognitive diversity
J. Williams & E. Taylor

Extending the dynamic range of phase contrast magnetic resonance velocity imaging using advanced higher-dimensional phase unwrapping algorithms
M. F. Salfity, J. M. Huntley, M. J. Graves, O. Marklund, R. Cusack & D. A. Beauregard

Sinking velocities of phytoplankton measured on a stable density gradient by laser scanning
A. E. Walcha & D. P. Holland

Characterization of the structure and composition of gecko adhesive setae
N. W. Rizzo, K. H. Gardner, D. J. Walls, N. M. Keiper-Hyrko, T. S. Garofie & D. L. Hallahan

Simple models for containment of a pandemic
J. Arino, F. Brauer, P. van den Driessche, J. Watmough & J. Wu

Report. Bacterial conversations: talking, listening and eavesdropping. A NERC Discussion Meeting held at the Royal Society on 7 December 2005
I. Joint

Report. Quantum catalysis in enzymes: beyond the transition state theory paradigm. A Discussion Meeting held at the Royal Society on 14 and 15 November 2005
N. S. Scrutton, M. J. Sutcliffe & P. L. Dutton
INTERFACE

Aims and Scope

Interface is a new international journal publishing papers from the interface between the physical sciences, including mathematics, and the life sciences. It provides a high-quality forum to publish rapidly and interact across this boundary in two main ways: Interface publishes research applying chemistry, engineering, materials science, mathematics and physics to the biological and medical sciences; it also highlights discoveries in the life sciences that allow advances in the physical sciences. Both sides of the interface are considered equally.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

SUBSCRIPTIONS

In 2006 Journal of the Royal Society Interface (ISSN 1742-5899) will be published bi-monthly, with six issues a year. Full details of subscriptions may be obtained on request from the Subscription Sales Department, The Royal Society, 6–9 Carlton House Terrace, London SW1Y 5AG. Tel: +44 (0)20 7451 2646; Fax: +44 (0)20 7976 1837; email: sales@royalsoc.ac.uk. The Royal Society is Registered Charity No. 207043.

GUIDANCE FOR AUTHORS

Topics

Interface welcomes articles on a diverse range of topics including, but not limited to:

- biocomplexity
- bioengineering
- bioinformatics
- biomaterials
- biomechanics
- biophysics
- chemical biology
- medical physics
- nanoscience and computer science (as applied to the life sciences)
- synthetic biology
- systems biology
- theoretical biology
- tissue engineering

Conditions of publication

Papers must not have been published previously, nor be under consideration for publication elsewhere. The Editor has final authority in all matters relating to publication.

Electronic submission details

The Royal Society’s electronic-submission and peer-review service provides interface authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

Visit: www.journals.royalsoc.ac.uk for further details.

Cover image: Arrays of keratinous bristles (setae) on the attachment pads of the Tinkay gecko. Micrograph by R. Bender, DuPont Central Research & Development. For further details, see Rizzo et al. (2006, this issue).
