Cross-scale influences on epidemiological dynamics: from genes to ecosystems

Papers of a Theme Issue compiled and edited by Daniel Haydon and Louise Matthews

Introduction. Cross-scale influences on epidemiological dynamics: from genes to ecosystems 763
L. Matthews & D. Haydon

The dynamic influence of genetic variation on the susceptibility of sheep to gastrointestinal nematode infection 767
M. J. Stear, L. Fitton, G. T. Innocent, L. Murphy, K. Rennie & L. Matthews

A short term benefit for outcrossing in a Daphnia metapopulation in relation to parasitism 777
D. Ebert, F. Altermatt & S. Lass

Patterns of antigenic diversity and the mechanisms that maintain them 787
M. Lipsitch & L. J. O’Mara

The evolutionary epidemiology of vaccination 803
I. Gandon & T. Day

Review. Campylobacter jejuni colonization and transmission in broiler chickens: a modelling perspective 819
A. J. K. Conlan, C. Coward, A. J. Grant, D. J. Maskell & J. R. Gog

Variation in host susceptibility and infectiousness generated by co-infection: the myxoma-Trichostigmus retortaeformis case in wild rabbits 831
I. M. Cattadori, R. Albert & B. Boag

Effects of heterogeneity in infection-exposure history and immunity on the dynamics of a protozoan parasite 841
M. Severins, D. Klinkenberg & H. Heesterbeek

Stochasticity and heterogeneity in host–vector models 851
A. L. Lloyd, J. Zhang & A. M. Root

Parameter estimation and prediction for the course of a single epidemic outbreak of a plant disease 865
A. Kociatkowski & C. A. Gilligan

When individual behaviour matters: homogeneous and network models in epidemiology 879
S. Bansal, B. T. Grenfell & L. A. Meyers

The effect of population structure on the emergence of drug resistance during influenza pandemics 893
F. Débarre, S. Bonhoeffer & R. R. Regoes

Disease dynamics over very different time-scales: foot-and-mouth disease and scrapie on the network of livestock movements in the UK 907
R. K. Kao, D. M. Green, J. Johnson & J. Z. Kui

Metapopulation dynamics of Escherichia coli O157 in cattle: an exploratory model 917
W.-C. Liu, L. Matthews, M. Chaos-Topping, N. J. Savill, D. J. Shaw & M. J. Woolhouse

Impact of scale on the effectiveness of disease control strategies for epidemics with cryptic infection in a dynamical landscape: an example for a crop disease 925
C. A. Gilligan, J. E. Truscott & A. J. Stacey

Review. Spatial dynamics and genetics of infectious diseases on heterogeneous landscapes 935
L. A. Real & R. Biek

Review. Landscape epidemiology of plant diseases 963
M. Plantegenest, C. L. May & F. Fabre

A framework for evaluating animals as sentinels for infectious disease surveillance 973

Accounting for biological variability and sampling scale: a multi-scale approach to building epidemic models 985
S. Soubeyrand, G. Thibaud & J. Chadœuf

Review. Spatial dynamics and genetics of infectious diseases on heterogeneous landscapes 935
L. A. Real & R. Biek

Review. Landscape epidemiology of plant diseases 963
M. Plantegenest, C. L. May & F. Fabre

A framework for evaluating animals as sentinels for infectious disease surveillance 973

Accounting for biological variability and sampling scale: a multi-scale approach to building epidemic models 985
S. Soubeyrand, G. Thibaud & J. Chadœuf
