Review. Natural origin biodegradable systems in tissue engineering and regenerative medicine: present status and some moving trends

Review. Biomechanics of male erectile function

D. Udelson

Review. A system’s view of the evolution of life

R. J. P. Williams

Ancestrally high elastic modulus of gecko setal β-keratin

A. M. Peattie, C. Majidi, A. Corder & R. J. Full

An integrated systems biology approach to understanding the rules of keratinocyte colony formation

T. Sun, P. McMinn, S. Coakley, M. Holcombe, R. Smallwood & S. MacNeil

Spectrum of genetic diversity and networks of clonal organisms

Approximate disease dynamics in household-structured populations

P. J. Dodd & N. M. Ferguson

Experimental characterization and computational modelling of two-dimensional cell spreading for skeletal regeneration

B. G. Sengers, C. P. Please & R. O. C. Oreffo

Vaccinating in disease-free regions: a vaccine model with application to yellow fever

C. T. Colbeck, P. M. Luz, F. Coelho, A. P. Galvani & C. Struchiner

The canine distemper epidemic in Serengeti: are lions victims of a new highly virulent canine distemper virus strain, or is pathogen circulation stochasticity to blame?

M. Gussenov, N. Bahr-Jaber, D. Fouche, F. Sausage & D. Portier

Viscoelastic nanoscale properties of cuticle contribute to the high-pass properties of spider vibration receptor (Cupiennius salei Keys)

M. E. McConney, C. F. Schaber, M. D. Julian, F. G. Barth & V. V. Tkuruk

Bile acids as constituents for dental composites: in vitro cytotoxicity of (meth)acrylate and other ester derivatives of bile acids

M. A. Gauthier, P. Simard, Z. Zhang & X. X. Zhu

Intact endothelial cell sheet harvesting from thermoresponsive surfaces coated with cell adhesion promoters

M. T. Moran, W. M. Carroll, A. Gorelov & Y. Rochev

Tensile and dynamic mechanical analysis of the distal portion of mussel (Mytilus edulis) byssal threads

N. Allden, T. Wilks, D. N. Williams & A. S. Clare

Report. A novel optical coherence tomography-based micro-indentation technique for mechanical characterization of hydrogels
