Review. A comparative study of the reported performance of ab initio protein structure prediction algorithms

G. Helles

Towards a nanomechanical basis for temporary adhesion in barnacle cyprids (Semibalanus balanoides)

I. Y. Phang, N. Aldred, A. S. Clare & C. J. Vancso

Noise, nonlinearity and seasonality: the epidemics of whooping cough revisited

H. T. H. Nguyen & P. Rohani

Premature deactivation of soleus during the propulsive phase of cat jumping

M. Kaya, T. R. Leonard & W. Herzog

Chitosan-mediated crystallization and assembly of hydroxyapatite nanoparticles into hybrid nanostructured films

R. Kumar, K. H. Prakash, P. Cheang, L. Gower & K. A. Khor

Strength statistics of adhesive contact between a fibrillar structure and a rough substrate

P. K. Porwal & C. Y. Hui

A foetal energy balance equation based on maternal exercise and diet

D. M. Thomas, J. F. Clapp & S. Shernce

Coloration using higher order optical interference in the wing pattern of the Madagascan sunset moth

S. Yoshioka, T. Nakano, Y. Nozue & S. Kinoshita

Ontogenetic scaling of foot musculoskeletal anatomy in elephants

C. E. Miller, C. Basu, C. Fritsch, T. Hildebrandt & J. R. Hutchinson

Report. X-ray colour imaging

R. J. Comink, K. H. Khor & C. Hansson
