Review. Periodic travelling waves in cyclic populations: field studies and reaction—diffusion models
J. A. Sherratt & M. J. Smith

The simulation of stress fibre and focal adhesion development in cells on patterned substrates
A. Pathak, V. S. Deshpande, R. M. McMeeking & A. G. Evans

Range and severity of a plant disease increased by global warming
N. Evans, A. Baier, M. A. Semenov, P. Gladders & B. D. L. Fitt

Integrative feedback and robustness in a lipid biosynthetic network
J. Beard, G. S. Attard & M. J. Cheetham

Antiviral treatment for the control of pandemic influenza: some logistical constraints
N. Arinaminpathy & A. R. McLean

Stochastic fluctuations in epidemics on networks
M. Simões, M. M. Telo da Gama & A. Nunes

Report. Fluid mechanics of nodal flow due to embryonic primary cilia
D. J. Smith, J. R. Blake & E. A. Gaffney
