Review. Development of free-energy-based models for chaperon containing TCP-1 mediated folding of actin
G. M. Altschuler & K. R. Willison

Detection of mortality clusters associated with highly pathogenic avian influenza in poultry: a theoretical analysis
N. J. Savill, S. G. St. Rose & M. E. J. Woolhouse

A simple modification of the Hodgkin and Huxley equations explains type 3 excitability in squid giant axons
J. R. Clay, D. Paydarfar & D. B. Forger

Perception of musical consonance and dissonance: an outcome of neural synchronization
I. Shapira Lots & L. Stone

Time-resolved tympanal mechanics of the locust
J. P. C. Windmill, S. Bockenhauer & D. Robert

Jaw protrusion enhances forces exerted on prey by suction feeding fishes
R. Holzman, S. W. Day, R. S. Mehta & P. C. Wainwright

Novel preparation of graded porous structures for medical engineering
A. Muthutantri, J. Huang & M. Edirisinghe

Scaling theory for information networks
M. E. Moses, S. Forrest, A. L. Davis, M. A. Lodder & J. H. Brown

Rotavirus within day care centres in Oxfordshire, UK: characterization of partial immunity
L. J. White, J. Buttery, B. Cooper, D. J. Nokes & G. F. Medley

Caecilian jaw-closing mechanics: integrating two muscle systems
T. Kleinteich, A. Haas & A. P. Summers

Report. The effect of opinion clustering on disease outbreaks
M. Salathé & S. Boinxkeffer
