Review articles

Fibrin gels and their clinical and bioengineering applications
P. A. Janmey, J. P. Winer & J. W. Weisel

Research articles

Tuberculosis reinfection rate as a proportion of total infection rate correlates with the logarithm of the incidence rate: a mathematical model
P. W. Uys, P. D. van Helden & J. W. Hargrove

Light alters nociceptive effects of magnetic field shielding in mice: intensity and wavelength considerations
J. S. Prato, D. Despradins-Holmes, L. D. Kenenísde, J. C. McKay, J. A. Robertson & A. W. Thomas

Dynamic mechanical oscillations during metamorphosis of the monarch butterfly
A. E. Pellung, R. R. Wilkinson, R. Stringer & J. K. Grimzewski

Modelling the time-dependent transmission rate for porcine circovirus type 2 (PCV2) in pigs using data from serial transmission experiments

Control of translation initiation: a model-based analysis from limited experimental data
R. J. Dimelow & S. J. Wilkinson

Systematic construction and prediction of the arrangement of the strands of sandwich proteins
T. S. Papatheodorou & A. S. Fokas

Odour character differences for enantiomers correlate with molecular flexibility
J. C. Brookes, A. P. Horstfield & A. M. Stoneham

Does a ‘turbophoretic’ effect account for layer concentrations of insects migrating in the stable night-time atmosphere?
A. M. Reynolds, D. R. Reynolds & J. R. Riley

The influence of mesoscale porosity on cortical bone anisotropy. Investigations via asymptotic homogenization
W. J. Parnell & Q. Grimal

Anomalous diffusion of heterogeneous populations characterized by normal diffusion at the individual level
S. Hapca, J. W. Crawford & I. M. Young

Reports

Rare peptide segments are found significantly more often in proto-oncoproteins than control proteins: implications for immunology and oncology
B. Trost, D. Kanduc & A. Kusalik
