Research articles

Deformable wing kinematics in the desert locust: how and why do camber, twist and topography vary through the stroke? 735

Spatio-temporal waves and targeted vaccination in recurrent epidemic network models 749
A. Litvak-Hinenzon & L. Stone

Integrating stochasticity and network structure into an epidemic model 761
C. E. Dangerfield, J. V. Ross & M. J. Keeling

A metapopulation modelling framework for gonorrhoea and other sexually transmitted infections in heterosexual populations 775
M. J. Choi, A. C. Ghani & W. J. Edmunds

Diversity sustains an evolving network 793
R. Mehrotra, V. Soni & S. Jain

Neuroactive conducting scaffolds: nerve growth factor conjugation on active ester-functionalized polypyrrole 801
J. Y. Lee, J.-W. Lee & C. E. Schmidt

Reports

Networks of influence and infection: parental choices and childhood disease 811
K. T. D. Eames
