Research articles

Deformable wing kinematics in the desert locust: how and why do camber, twist and topography vary through the stroke?

Spatio-temporal waves and targeted vaccination in recurrent epidemic network models
A. Litvak-Hinenzon & L. Stone

Integrating stochasticity and network structure into an epidemic model
C. E. Dangerfield, J. V. Ross & M. J. Keeling

A metapopulation modelling framework for gonorrhoea and other sexually transmitted infections in heterosexual populations
M. I. Chen, A. C. Ghani & W. J. Edmunds

Diversity sustains an evolving network
R. Mehrotra, V. Soni & S. Jain

Neuroactive conducting scaffolds: nerve growth factor conjugation on active ester-functionalized polypyrrole

Reports

Networks of influence and infection: parental choices and childhood disease
K. T. D. Eames

Volume 6, Number 38, Pages 735–814
6 September 2009
