Airborne transmission of disease in hospitals

Organized by Ian Eames

Introduction
Airborne transmission of disease in hospitals
I. Eames, J. W. Tang, Y. Li & P. Wilson

5697

Articles
Exhaled droplets due to talking and coughing
X. Xie, Y. Li, H. Sun & L. Liu

5703

Personalized ventilation as a control measure for airborne transmissible disease spread
J. FanTile, C. N. Sae-To, K. W. Tham, C. Y. H. Chao & Y. C. M. Kho

5715

A schlieren optical study of the human cough with and without wearing masks for aerosol infection control
J. W. Tang, T. J. Liebner, B. A. Craven & G. S. Settles

5727

The effect of environmental parameters on the survival of airborne infectious agents
J. W. Tang

5737

Control of airborne infectious diseases in ventilated spaces
P. V. Nielsen

5747

Movement of airborne contaminants in a hospital isolation room
I. Eames, D. Shoaib, C. A. Klettner & V. Taban

5757

Some aspects of the airborne transmission of infection
B. P. Clark & M. L. de Calcina-Goff

5767

Aerosol transmission of Influenza A virus: a review of new studies
R. Tellier

5783

Mathematical models for assessing the role of airflow on the risk of airborne infection in hospital wards
C. J. Noakes & P. A. Skirgh
