Airborne transmission of disease in hospitals

Organized by Ian Eames

Introduction
Airborne transmission of disease in hospitals 5697
I. Eames, J. W. Tang, Y. Li & P. Wilson

Articles
Exhaled droplets due to talking and coughing 5703
X. Xie, Y. Li, H. Sun & L. Liu

Personalized ventilation as a control measure for airborne transmissible disease spread 5715
I. Fantle, C. N. Sai-To, K. W. Tham, C. Y. H. Chao & Y. C. M. Kho

A schlieren optical study of the human cough with and without wearing masks for aerosol infection control 5727
J. W. Tang, T. J. Liebner, B. A. Craven & G. S. Settles

The effect of environmental parameters on the survival of airborne infectious agents 5737
J. W. Tang

Control of airborne infectious diseases in ventilated spaces 5747
P. V. Nielsen

Movement of airborne contaminants in a hospital isolation room 5757
I. Eames, D. Shoaib, C. A. Klettner & V. Taban

Some aspects of the airborne transmission of infection 5767
R. P. Clark & M. L. de Calcina-Goff

Aerosol transmission of influenza A virus: a review of new studies 5783
R. Tellier

Mathematical models for assessing the role of airflow on the risk of airborne infection in hospital wards 5791
C. J. Noakes & P. A. Skrgh
