

Review articles

- Modelling the influence of human behaviour on the spread of infectious diseases: a review** 1247
S. Funk, M. Salathé & V. A. A. Jansen

Research articles

- A two-tiered model for simulating the ecological and evolutionary dynamics of rapidly evolving viruses, with an application to influenza** 1257
K. Koelle, P. Khatri, M. Kamradt & T. B. Kepler

- Changing and shielded magnetic fields suppress c-Fos expression in the navigation circuit: input from the magnetosensory system contributes to the internal representation of space in a subterranean rodent** 1275
T. Burger, M. Lucová, R. E. Moritz, H. H. A. Oelschläger, R. Druga, H. Burda, W. Wiltschko, R. Wiltschko & P. Němec

- Laminar flow around corners triggers the formation of biofilm streamers** 1293
R. Rusconi, S. Lecuyer, L. Guglielmini & H. A. Stone

- Evolutionary optimality in stochastic search problems** 1301
M. D. Preston, J. W. Pitchford & A. J. Wood

- Synthesizing within-host and population-level selective pressures on viral populations: the impact of adaptive immunity on viral immune escape** 1311
I. Volkov, K. M. Pepin, J. O. Lloyd-Smith, J. R. Banavar & B. T. Grenfell

- Ontogenetic development of migration: Lagrangian drift trajectories suggest a new paradigm for sea turtles** 1319
G. C. Hays, S. Fossette, K. A. Katselidis, P. Mariani & G. Schofield

- Stance and swing phase costs in human walking** 1329
B. R. Umberger

- Topological network alignment uncovers biological function and phylogeny** 1341
O. Kuchaiev, T. Milenković, V. Memišević, W. Hayes & N. Pržulj

- Dynamics of infectious disease transmission by inhalable respiratory droplets** 1355
N. I. Stilianakis & Y. Drossinos

- The competitive adsorption of human proteins onto natural-based biomaterials** 1367
C. M. Alves, R. L. Reis & J. A. Hunt

- Fractional rate of change of swim-bladder volume is reliably related to absolute depth during vertical displacements in teleost fish** 1379
G. K. Taylor, R. I. Holbrook & T. B. de Perera

Reports

- The attachment strategy of English ivy: a complex mechanism acting on several hierarchical levels** 1383
B. Melzer, T. Steinbrecher, R. Seidel, O. Kraft, R. Schwaiger & T. Speck

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science

Registered Charity No 207043
