no. 42, 6 January 2010

Editorial
Le Roi est mort, vive le Roi!
By W. Bonfield and L. Dutton

Review articles
Optical imaging-guided cancer therapy with fluorescent nanoparticles
By S. Jiang, M. K. Gnanasammandhan and Y. Zhang

Research articles
A mathematical model of wound healing and subsequent scarring
By B. D. Cumming, D. L. S. McElwain and Z. Upton
Towards a quantitative understanding of the within-host dynamics of influenza A infections
By A. Handel, I. M. Longini Jr and R. Antia
Going beyond histology. Synchrotron micro-computed tomography as a methodology for biological tissue characterization: from tissue morphology to individual cells
A quantitative comparison of bird and bat wakes
By L. C. Johansson, M. Wolf and A. Hedenström
Control of equine influenza: scenario testing using a realistic metapopulation model of spread
By M. Baguelin, J. R. Newton, N. Demiris, J. Daly, J. A. Munford and J. L. N. Wood
A novel in vivo method for quantifying the interfacial biochemical bond strength of bone implants
By Y.-T. Sul, C. Johansson and T. Albrektsson
Measurements of the wall shear stress distribution in the outflow tract of an embryonic chicken heart
By C. Poelma, K. Van der Heiden, B. P. Hierck, R. E. Poelmann and J. Westerweel
Mathematical modelling of the active hearing process in mosquitoes
By D. Avitabile, M. Homer, A. R. Champneys, J. C. Jackson and D. Robert
North–South divide: contrasting impacts of climate change on crop yields in Scotland and England
By M. H. Butterworth, M. A. Semenov, A. Barnes, D. Moran, J. S. West and B. D. L. Fitt
Deformable wing kinematics in free-flying hoverflies
Ant antennae: are they sites for magnetoreception?
By J. F. de Oliveira, E. Wajnberg, D. M. de Souza Esquivel, S. Weinkauf, M. Winklhofer and M. Hanzik
Predicting muscle activation patterns from motion and anatomy: modelling the skull of Sphenodon (Diapsida: Rhychocephalia)
Predators indirectly control vector-borne disease: linking predator–prey and host–pathogen models
By S. M. Moore, E. T. Borer and P. R. Hosseini
Use of adipose stem cells and polylactide discs for tissue engineering of the temporomandibular joint disc
By K. Mäenpää, V. Ellä, J. Mauno, M. Kellomäki, R. Suuronen, T. Ylikomi and S. Miettinen
A novel jet-based nano-hydroxyapatite patterning technique for osteoblast guidance
By X. Li, G. Koller, J. Huang, L. Di Silvio, T. Renton, M. Esat, W. Bonfield and M. Edirisinghe
Evidence for intermittency and a truncated power law from highly resolved aphid movement data
By A. Mashanova, T. H. Oliver and V. A. A. Jansen

no. 43, 6 February 2010

Review articles
Bone tissue engineering therapeutics: controlled drug delivery in three-dimensional scaffolds
By V. Mourino and A. R. Boccaccini

Research articles
Rate-dependent frictional adhesion in natural and synthetic gecko setae
no. 45, 6 April 2010

Review articles

Next-generation tools for evolutionary invasion analyses
By A. Hurford, D. Cownden and T. Day

Research articles

Strategies for mitigating an influenza pandemic with pre-pandemic H5N1 vaccines
By G. Milne, J. Kelso and H. Kelly

Insect tricks: two-phasic foot pad secretion prevents slipping
By J.-H. Dirks, C. J. Clemente and W. Federle

Bio-electrospraying the nematode Caenorhabditis elegans: studying whole-genome transcriptional responses and key life cycle parameters
By N. Mongkoldhumrongkul, S. C. Swain, S. N. Jayasinghe and S. Stürzenbaum

Enhancement of natural background gamma-radiation dose around uranium microparticles in the human body
By J. E. Pattison, R. P. Hugtenburg and S. Green

Morphological communication: exploiting coupled dynamics in a complex mechanical structure to achieve locomotion
By J. A. Rieffel, F. J. Valero-Cuevas and H. Lipson

Resolving the impact of waiting time distributions on the persistence of measles

Relationships between specific surface area and pore size in electrospun polymer fibre networks
By S. J. Eichhorn and W. W. Sampson

The control systems structures of energy metabolism
By M. Cloutier and P. Wellstead

One-step electrohydrodynamic production of drug-loaded micro- and nanoparticles
By M. Enayati, Z. Ahmad, E. Stride and M. Edirisinghe

Multidisciplinary fingerprints: forensic reconstruction of an insect reinvasion
By K. S. Kim, G. D. Jones, J. K. Westbrook and T. W. Sappington

Estimating Young’s modulus of zona pellucida by micropipette aspiration in combination with theoretical models of ovum
By M. Khalilian, M. Navidbakhsh, M. R. Valojerdi, M. Chizari and P. E. Yazdi

Preventable H5N1 avian influenza epidemics in the British poultry industry network exhibit characteristic scales
By A. R. T. Jonkers, K. J. Sharkey and R. M. Christley

no. 46, 6 May 2010

Review articles

Placing microalgae on the biofuels priority list: a review of the technological challenges

Research articles

Decreasing stochasticity through enhanced seasonality in measles epidemics
By N. B. Mantilla-Beniers, O. N. Bjørnstad, B. T. Grenfell and P. Rohani

A novel biomimetic approach to the design of high-performance ceramic—metal composites

Distribution of vaccine/antivirals and the ‘least spread line’ in a stratified population
By E. Goldstein, A. Apolloni, B. Lewis, J. C. Miller, M. Macauley, S. Eubank, M. Lipsitch and J. Wallinga

Reflectivity of the gyroid biophotonic crystals in the ventral wing scales of the Green Hairstreak butterfly, Calliphrys rubi
By K. Michielsen, H. De Raedt and D. G. Stavenga

Hydrodynamic constraints on prey-capture performance in forward-striking snakes
By S. Van Wassenbergh, J. Brecko, P. Aerts, I. Stouten, G. Vanheusden, A. Camps, R. Van Damme and A. Herrel

Modelling the layer-specific three-dimensional residual stresses in arteries, with an application to the human aorta
By G. A. Holzapfel and R. W. Ogden

Rate-dependent control strategies stabilize limb forces during human locomotion
By J. T. Yen and Y.-H. Chang
Transient virulence of emerging pathogens
By B. M. Bolker, A. Nanda and D. Shah 811

Systemic risk: the dynamics of model banking systems
By R. M. May and N. Arinaminpathy 823

Deformation micromechanisms of collagen fibrils under uniaxial tension
By Y. Tang, R. Ballarini, M. J. Buehler and S. J. Eppell 839

Nearby boundaries create eddies near microscopic filter feeders
By R. E. Pepper, M. Roper, S. Ryu, P. Matsudaira and H. A. Stone 851

no. 47, 6 June 2010

Review articles
Single cell optical transfection
By D. J. Stevenson, F. J. Gunn-Moore, P. Campbell and K. Dholakia 863

Research articles
The construction of next-generation matrices for compartmental epidemic models
By O. Diekmann, J. A. P. Heesterbeek and M. G. Roberts 873

Bioinspired artificial photonic nanoarchitecture using the elytron of the beetle
Trigonophorus rothschildi varians as a ‘blueprint’

Mechanical loading of in situ chondrocytes in lapine retropatellar cartilage after anterior cruciate ligament transection
By S.-K. Han, R. Seerattan and W. Herzog 895

What is the mechanism for persistent coexistence of drug-susceptible and drug-resistant strains of Streptococcus pneumoniae?
By C. Colijn, T. Cohen, C. Fraser, W. Hanage, E. Goldstein, N. Givon-Lavi, R. Dagan and M. Lipsitch 905

Bioinspired engineering study of Plantae vasculae for self-healing composite structures
By R. S. Trask and I. P. Bond 921

The fluid dynamics of canine olfaction: unique nasal airflow patterns as an explanation of macrosmia
By B. A. Craven, E. G. Paterson and G. S. Settles 933

Computational limits to binary genes
By N. R. Zabet and D. F. Chu 945

Nonlinear elasticity of biological tissues with statistical fibre orientation
By S. Federico and T. C. Gasser 955

Flow instability and wall shear stress variation in intracranial aneurysms
By H. Baek, M. V. Jayaraman, P. D. Richardson and G. E. Karniadakis 967

no. 48, 6 July 2010

Review articles
Systems engineering medicine: engineering the inflammation response to infectious and traumatic challenges
By R. S. Parker and G. Clermont 989

Research articles
Biocharts: a visual formalism for complex biological systems
By H. Kugler, A. Larjo and D. Harel 1015

Strontium borate glass: potential biomaterial for bone regeneration

How necessary is a fast testkit for mitigation of pandemic flu?
By J. Chin, G. Koh and D.-Y. Lee 1033

A minimum of two distinct heritable factors are required to explain correlation structures in proliferating lymphocytes
By J. F. Markham, C. J. Wellard, E. D. Hawkins, K. R. Duffy and P. D. Hodgkin 1049

Rational spatio-temporal strategies for controlling a Chagas disease vector in urban environments
By M. Z. Levy, F. S. Malaga Chavez, J. G. Cornejo del Carpio, D. A. Vilhena, F. E. McKenzie and J. B. Plotkin 1061

Switchable genetic oscillator operating in quasi-stable mode
By N. Streilkowa and M. Barahona 1071
Complexity and anisotropy in host morphology make populations less susceptible to epidemic outbreaks
By F. J. Pérez-Reche, S. N. Taraskin, L. da F. Costa, F. M. Neri and C. A. Gilligan 1083

The complex network of global cargo ship movements
By P. Kaluza, A. Kölzsch, M. T. Gastner and B. Blasius 1093

The effectiveness of an air cleaner in controlling droplet/aerosol particle dispersion emitted from a patient’s mouth in the indoor environment of dental clinics
By C. Chen, B. Zhao, W. Cui, L. Dong, N. An and X. Ouyang 1105

Protocols for sampling viral sequences to study epidemic dynamics
By J. C. Stack, J. D. Welch, M. J. Ferrari, B. U. Shapiro and B. T. Grenfell 1119

Reports
Transferring vertically aligned carbon nanotubes onto a polymeric substrate using a hot embossing technique for microfluidic applications
By A. Mathur, S. S. Roy and J. A. McLaughlin 1129

no. 49, 6 August 2010

Review articles
Fluorescence-based transient state monitoring for biomolecular spectroscopy and imaging
By J. Widengren 1135

Research articles
Scaling and mechanics of carnivoran footpads reveal the principles of footpad design
By K.-J. Chi and V. L. Roth 1145

Simulation of lung alveolar epithelial wound healing in vitro
By S. H. J. Kim, M. A. Matthay, K. Mostov and C. A. Hunt 1157

Development of magnesium calcium phosphate biocement for bone regeneration

Analytical methods for quantifying environmental connectivity for the control and surveillance of infectious disease spread
By J. Remais, A. Akullian, L. Ding and E. Seto 1181

Cerebrospinal fluid dynamics in the human cranial subarachnoid space: an overlooked mediator of cerebral disease. I. Computational model
By S. Gupta, M. Soellinger, D. M. Grzybowski, P. Boesiger, J. Biddiscombe, D. Poulikakos and V. Kurtcuoglu 1195

Cerebrospinal fluid dynamics in the human cranial subarachnoid space: an overlooked mediator of cerebral disease. II. In vitro arachnoid outflow model
By D. W. Holman, V. Kurtcuoglu and D. M. Grzybowski 1205

Stochasticity in staged models of epidemics: quantifying the dynamics of whooping cough
By A. J. Black and A. J. McKane 1219

Characterization and analysis of carbon fibre-reinforced polymer composite laminates with embedded circular vasculature
By C.-Y. Huang, R. S. Trask and I. P. Bond 1229

Reports
Corrections to the theory and the optimal line in the swimming diagram of Taylor (1952)
By J. A. C. Humphrey, J. Chen, T. Iwasaki and W. O. Friesen 1243

no. 50, 6 September 2010

Review articles
Modelling the influence of human behaviour on the spread of infectious diseases: a review
By S. Funk, M. Salathé and V. A. A. Jansen 1247

Research articles
A two-tiered model for simulating the ecological and evolutionary dynamics of rapidly evolving viruses, with an application to influenza
By K. Koelle, P. Khatri, M. Kamradt and T. B. Kepler 1257

Changing and shielded magnetic fields suppress c-Fos expression in the navigation circuit: input from the magnetosensory system contributes to the internal representation of space in a subterranean rodent
Laminar flow around corners triggers the formation of biofilm streamers
By R. Rusconi, S. Lecuyer, L. Guglielmini and H. A. Stone 1293

Evolutionary optimality in stochastic search problems
By M. D. Preston, J. W. Pitchford and A. J. Wood 1301

Synthesizing within-host and population-level selective pressures on viral populations: the impact of adaptive immunity on viral immune escape
By I. Volkov, K. M. Pepin, J. O. Lloyd-Smith, J. R. Banavar and B. T. Grenfell 1311

Ontogenetic development of migration: Lagrangian drift trajectories suggest a new paradigm for sea turtles
By G. C. Hays, S. Fossette, K. A. Katselidis, P. Mariani and G. Schofield 1319

Stance and swing phase costs in human walking
By B. R. Umberger 1329

Topological network alignment uncovers biological function and phylogeny
By O. Kuchaiev, T. Milenković, V. Memišević, W. Hayes and N. Pržulj 1341

Dynamics of infectious disease transmission by inhalable respiratory droplets
By N. I. Stilianakis and Y. Drossinos 1355

The competitive adsorption of human proteins onto natural-based biomaterials
By C. M. Alves, R. L. Reis and J. A. Hunt 1367

Fractional rate of change of swim-bladder volume is reliably related to absolute depth during vertical displacements in teleost fish
By G. K. Taylor, R. I. Holbrook and T. B. de Perera 1379

Reports
The attachment strategy of English ivy: a complex mechanism acting on several hierarchical levels

no. 51, 6 October 2010

Review articles
Bioenergy research: a new paradigm in multidisciplinary research
By U. C. Kalluri and M. Keller 1391

Research articles
A theoretical study of diffusional transport over the alveolar surfactant layer
By C. Åberg, E. Sparr, M. Larsson and H. Wennerström 1403

Incomplete and noisy network data as a percolation process
By M. P. H. Stumpf and C. Winf 1411

Economically optimal timing for crop disease control under uncertainty: an options approach
By M. L. N. Mbah, G. A. Forster, J. H. Wesseler and C. A. Gilligan 1421

Reducing number entry errors: solving a widespread, serious problem
By H. Thimbleby and P. Cairns 1429

Fish in a ring: spatio-temporal pattern formation in one-dimensional animal groups
By N. Abaid and M. Porfiri 1441

Risk factors for the evolutionary emergence of pathogens
By H. K. Alexander and T. Day 1455

Characterization of age-related variation in corneal biomechanical properties
By A. Elsheikh, B. Geraghty, P. Rama, M. Campanelli and K. M. Meek 1475

Why do insects have such a high density of flow-sensing hairs? Insights from the hydromechanics of biomimetic MEMS sensors
By J. Casas, T. Steinmann and G. Krijnen 1487

Reports
Visualizing biointerfaces in three dimensions: electron tomography of the bone–hydroxyapatite interface
By K. Grandfield, E. A. McNally, A. Palmquist, G. A. Botton, P. Thomsen and H. Engqvist 1497

no. 52, 6 November 2010

Review articles
A comparative analysis of synthetic genetic oscillators
By O. Purcell, N. J. Savery, C. S. Grierson and M. di Bernardo 1503
Research articles
Cellular automata and integrodifferential equation models for cell renewal in mosaic tissues
By J. M. Bloomfield, J. A. Sherratt, K. J. Painter and G. Landini 1525
Estimation of measles vaccine efficacy and critical vaccination coverage in a highly vaccinated population
By M. van Boven, M. Kretzschmar, J. Wallinga, P. D. O’Neill, O. Wichmann and S. Hahné 1537
Coordination of multiple appendages in drag-based swimming
By S. Alben, K. Spears, S. Garth, D. Murphy and J. Yen 1545
Health in financial crises: economic recession and tuberculosis in Central and Eastern Europe
By N. Arinaminpathy and C. Dye 1559
Slippery pores: anti-adhesive effect of nanoporous substrates on the beetle attachment system
By E. V. Gorb, N. Hosoda, C. Miksch and S. N. Gorb 1571
Buckling of sheared and compressed microfibrils
By N. Nadermann, A. Kumar, S. Goyal and C.-Y. Hui 1581
Unsteady motion: escape jumps in planktonic copepods, their kinematics and energetics
By T. Kiorboe, A. Andersen, V. J. Langlois and H. H. Jakobsen 1591
Frequency response of lift control in Drosophila
By C. F. Graetzel, B. J. Nelson and S. N. Fry 1603
Differential effects of magnetic pulses on the orientation of naturally migrating birds
By R. A. Holland 1617
Spatial dynamics of bar-headed goose migration in the context of H5N1

Reports
A novel route for processing cobalt–chromium–molybdenum orthopaedic alloys
By B. Patel, F. Inam, M. Reece, M. Edirisinghe, W. Bonfield, J. Huang and A. Angadji 1641
Supplement 1, 6 February 2010

NanoBioInterface: crossing borders

Organized by C. James Kirkpatrick and William Bonfield

Introduction
NanoBioInterface: a multidisciplinary challenge
By C. J. Kirkpatrick and W. Bonfield

Articles
Quantitative analysis of the protein corona on FePt nanoparticles formed by transferrin binding

Nanoparticle interaction with model lung surfactant monolayers
By R. K. Harishchandra, M. Saleem and H.-J. Galla

Oxidative stress and inflammation response after nanoparticle exposure: differences between human lung cell monocultures and an advanced three-dimensional model of the human epithelial airways
By L. Müller, M. Riediker, P. Wick, M. Mohr, P. Gehr and B. Rothen-Rutishauser

An impaired alveolar-capillary barrier in vitro: effect of proinflammatory cytokines and consequences on nanocarrier interaction
By M. I. Hermanns, J. Kasper, P. Dubruel, C. Pohl, C. Uboldi, V. Vermeersch, S. Fuchs, R. E. Unger and C. J. Kirkpatrick

Targeted drug-delivery approaches by particulate carriers in the therapy of inflammatory diseases
By W. Ulbrich and A. Lamprecht

Balancing protection and release of DNA: tools to address a bottleneck of non-viral gene delivery
By C. L. Grigsby and K. W. Leong

Bioreponsive nanosensors in medical imaging
By E. Schellenberger

Biological nano-functionalization of titanium-based biomaterial surfaces: a flexible toolbox
By R. Beutner, J. Michael, B. Schwenzer and D. Scharnweber

Fluorescence two-dimensional difference gel electrophoresis for biomaterial applications
By L. E. McNamara, M. J. Dalby, M. O. Riehle and R. Burchmore

Nanoparticles, human health hazard and regulation
By A. Seaton, L. Tran, R. Aitken and K. Donaldson

Supplement 2, 6 April 2010

Magnetoreception

Organized by Michael Winklhofer

Introduction
Magnetoreception
By M. Winklhofer

Articles
Photoreceptor-based magnetoreception: optimal design of receptor molecules, cells, and neuronal processing
By T. Ritz, M. Ahmad, H. Mouritsen, R. Wiltschko and W. Wiltschko

Cryptochromes—a potential magnetoreceptor: what do we know and what do we want to know?
By M. Liedvogel and H. Mouritsen

Directional orientation of birds by the magnetic field under different light conditions
By R. Wiltschko, K. Stapput, P. Thalau and W. Wiltschko

Biophysics of magnetic orientation: strengthening the interface between theory and experimental design
By J. L. Kirschvink, M. Winklhofer and M. M. Walker

Avian magnetite-based magnetoreception: a physiologist’s perspective
By H. Cadiou and P. A. McNaughton

Magnetoreception in eusocial insects: an update
By E. Wajnberg, D. Acosta-Avalos, O. C. Alves, J. F. de Oliveira, R. B. Srygley and D. M. S. Esquivel

Night-migratory garden warblers can orient with their magnetic compass using the left, the right or both eyes
By C. M. Hein, M. Zapka, D. Heyers, S. Kutzschbauch, N.-L. Schneider and H. Mouritsen

Lateralization of magnetic compass orientation in pigeons
By C. Wilzeck, W. Wiltschko, O. Güntürkün, R. Wiltschko and H. Prior

J. R. Soc. Interface (2010)
Light-dependent magnetic compass orientation in amphibians and insects: candidate receptors and candidate molecular mechanisms
   By J. B. Phillips, P. E. Jorge and R. Muheim S241

Effects of disorder and motion in a radical pair magnetoreceptor
   By J. C. S. Lau, N. Wagner-Rundell, C. T. Rodgers, N. J. B. Green and P. J. Hore S257

Can disordered radical pair systems provide a basis for a magnetic compass in animals?
   By E. Hill and T. Ritz S265

A quantitative assessment of torque-transducer models for magnetoreception
   By M. Winklhofer and J. L. Kirschvink S273

Supplement 3, 6 June 2010

Mechanobiology
Organized by Chwee Teck Lim

Introduction
Mechanobiology
   By C. T. Lim, A. Bershadsky and M. P. Sheetz S291

Articles
Insights into the mechanisms of myosin and kinesin molecular motors from the single-molecule unbinding force measurements
   By S. V. Mikhailenko, Y. Oguchi and S. Ishiwata S295

Mechanosensitivity of ion channels based on protein–lipid interactions
   By K. Yoshimura and M. Sokabe S307

Emergence of a prestressed eukaryotic nucleus during cellular differentiation and development
   By A. Mazumder and G. V. Shivashankar S321

Biomechanical effects of environmental and engineered particles on human airway smooth muscle cells

Intercellular mechanotransduction during multicellular morphodynamics
   By J.-H. Kim, L. J. Dooling and A. R. Asthagiri S341

Computational model of cell positioning: directed and collective migration in the intestinal crypt epithelium
   By S. Y. Wong, K.-H. Chiam, C. T. Lim and P. Matsudaira S351

Live cell imaging of mechanotransduction
   By B. Liu, T.-J. Kim and Y. Wang S365

Supplement 4, 6 August 2010

Scaling the heights—challenges in medical materials: an issue in honour of William Bonfield, Part I. Particles and drug delivery
Organized by Mohan Edirisinghe and Eleanor Stride

Introduction
Scaling the heights—challenges in medical materials
   By M. Edirisinghe and E. Stride S377

Articles
Twenty-first century challenges for biomaterials
   By L. L. Hench and I. Thompson S379

Size mapping of electric field-assisted production of polycaprolactone particles
   By M. Enayati, Z. Ahmad, E. Stride and M. Edirisinghe S393

Needle-shaped polymeric particles induce transient disruption of cell membranes
   By N. Doshi and S. Mitragotri S403

A review of nanoparticle functionality and toxicity on the central nervous system

In silico modelling of drug–polymer interactions for pharmaceutical formulations
   By S. Ahmad, B. F. Johnston, S. P. Mackay, A. G. Schatzlein, P. Gellert, D. Sengupta and I. F. Uchegbu S423

SUBSCRIPTIONS
In 2011 Journal of the Royal Society Interface (ISSN 1742-5689) will be published monthly, with twelve issues a year. Full details of subscriptions may be obtained either by contacting our journal fulfilment agent, Portland Customer Services, Commercia Way, Colchester CO2 8NP, UK; tel.: +44 (0)1206 790351; fax: +44 (0)1206 799331; email: sales@portland-services.com or by visiting our website at royalsocietypublishing.org/subscribe. From 2008 personal subscriptions are available for this journal—see prices. Full ordering information can be obtained from Portland Customer Services. These rates apply to bona fide individual use only. They must be paid by personal cheque or credit card, and orders cannot be delivered to an institutional address. The Royal Society is Registered Charity No 2079635.

GUIDANCE FOR AUTHORS
Articles
Articles are contributions up to 8000 words containing original scientific research.

Reports
Reports are short, letter-style contributions (up to 2500 words), which are published rapidly. Preliminary and more speculative work of high quality is strongly encouraged.

Both articles and reports should be prepared for audiences in a wide range of disciplines.

Reviews
Reviews are articles of the highest quality and aim to be of interest to communities working at the physical sciences—life sciences interface. Reviews cover the latest developments in an area of cross-disciplinary research. They put such research into a broader context and are written in a style that makes it accessible to readers in a wide range of disciplines. Reviews are normally published by invitation; however, we are also keen to receive proposals for prospective articles. Complete literature surveys are not encouraged.

Selection criteria
The peer review process will give equal weighting to sciences on both sides of the interface. The criteria for selection are scientific excellence, originality and potential interest to a wide spectrum of scientists. All papers are peer-reviewed to a high standard and published rapidly under the control of the Editor and his distinguished Editorial Board.

Topics
Interface welcomes articles on a diverse range of topics including, but not limited to:

- biomechanics
- bioinformatics
- biomaterials
- bioinformatics
- bionanoscience
- biocomputation
- chemical biology
- chemical biology
- bioengineering
- medical physics
- synthetic biology
- systems biology
- theoretical biology
- tissue engineering

Conditions of publication
Papers indexed in PubMed if published previously not be under consideration for publication elsewhere. The Editor has final authority in all matters relating to publication.

Electronic submission details
The Royal Society’s electronic submission and peer-review service provides Interface authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

Visit rsif.royalsocietypublishing.org for further details.
