This paper meets the requirements of ISO 9706:1994(E) and ANSI/NISO Z39.48-1992 (Permanence of Paper) effective with volume 1, issue 1, 2004.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

Aims and Scope
Each issue of Interface Focus is devoted to specific topics at the interface of the physical and life sciences. It facilitates cross-disciplinary research across this traditional divide by acting as a forum accessible to all. Each issue aims to include a combination of high quality research and review articles and all contributions are peer-reviewed by the Royal Society’s examing standards. Articles are initially published online and subsequently in a printed supplement to J. R. Soc. Interface.

Guidance for Authors

Selection criteria
The criteria for selection for both theme issues and their constituent articles are scientific excellence, originality and interest across the physical sciences / life sciences interface. The Editor is responsible for all editorial decisions, in part based on the reports received from the referees. Many more good proposals and articles are submitted to us than we have space to print; we give preference to those that are of broad interest and of high scientific quality.

Publishing format
Along with all Royal Society journals, we are committed to archiving and providing perpetual access. The journal also offers the facility for including Electronic Supplementary Material to papers free of charge.

Conditions of publication
Articles must not have been published previously nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Interface Focus employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor has final authority in all matters relating to publication.

Electronic Submission details
The majority of Interface Focus issues are commissioned. However, suggestions for themes are welcome and initial proposals should be addressed to tim.holt@royalsociety.org. For full submission guidelines and access to all journal content please visit the J. R. Soc. Interface website at rsif.royalsocietypublishing.org.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

Objectives of The Royal Society are to:

- recognize excellence in science
- support leading-edge scientific research and its applications
- stimulate international interaction
- further the role of science, engineering and technology in society
- promote the public’s understanding of science
- provide independent authoritative advice on matters relating to science, engineering and technology
- encourage research into the history of science

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling +44 (0)20 7839 5561, or visit the Society’s web site (www.royalsociety.org).
