Articles
Articles are contributions up to 8000 words containing original scientific research.

Reports
Reports are short, letter-style contributions (up to 2500 words), which are published rapidly. Preliminary and more speculative work of high quality is strongly encouraged.

Both articles and reports should be written for audiences in a wide range of disciplines.

Reviews
Reviews are articles of the highest quality and aim to be of interest to communities working at the physical sciences-life sciences interface. Reviews cover the latest developments in an area of cross-disciplinary research. They put such research into a broader context and are written in a style that makes them accessible to readers in a wide range of disciplines. Reviews are normally published by invitation; however, we are also keen to receive proposals for prospective articles. Complete literature surveys are not encouraged.

Selection criteria
The review process will give equal weighting to sciences on both sides of the interface. The criteria for selection are scientific excellence, originality and potential interest to a wide spectrum of scientists. All papers are peer-reviewed to a high standard and published rapidly under the control of the Editor and his distinguished Editorial Board.

GUIDANCE FOR AUTHORS
Interface welcomes articles on a diverse range of topics including, but not limited to:

- bionanotechnology
- biocomputation
- biomaterials
- biology
- bioengineering
- biocomplexity
- biophysics
- biomedical engineering
- bioinformatics
- synthetic biology
- biomathematics
- systems biology
- bionanosciences
- theoretical biology
- tissue engineering

Conditions of publication
Papers in Interface have not been published previously nor are under consideration for publication elsewhere. The Editor has final authority in all matters relating to publication.

Electronic submission details
The Royal Society’s electronic-submission and peer-review service provides Interface authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialing +44 (0)20 7839 5561, or visit the Society’s Web site (royalsociety.org).

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of scientific progress. We support many top young scientists, engineers and technologists, influence science policy, debate scientific issues with the public and much more. We seek to be an independent, charitable body and derive our authoritative status from over 1400 Fellows and Foreign Members.

Our mission is to: expand knowledge and further the role of science and engineering in making the world a better place.

The Royal Society’s strategic priorities are to:

- invest in future scientific leaders and in innovation,
- influence policymakers with the best scientific evidence,
- integrate science and mathematics education,
- increase access to the best science internationally, and
- inspire an interest in the joy, wonder and excitement of scientific discovery.

For more information, please contact the Science Policy Centre.
